

Innovative Absorbents You Can Rely On

**BRIGHTSORB™ High-visibility
Safety Absorbents**

BRIGHTSORB™ high-visibility safety absorbents combine safety signage with quality absorbency

While absorbents can be used to clean-up leaks, drips and spills, and reduce moisture in aisles and walkways, sometimes absorbency alone isn't enough. Consider areas with low visibility, where a standard grey, universal pad may go unnoticed to employees working nearby. Or consider a work cell where, despite best efforts, trips still seem to occur frequently. For these situations and more, rely on Brady SPC BRIGHTSORB high-visibility safety absorbents which feature:

- Highly visible, yellow coloring that's noticeable even in the darkest corners of your facility
- Iconic "slipping man" logo with multi-lingual caution messaging to promote a culture of safety
- A full line, including pads, rolls, high traffic absorbents, pillows, SOCs and spill kits allowing you to standardize on one product, mix and match, or migrate your whole facility to a high-visibility facility

Did you know?

Slips, trips and falls are one of the greatest issues plaguing organizations, accounting for 1 in 6 lost-time injuries and 96 million workdays lost per year. One of the most frequent causes of slips, trips and falls is a wet work surface.

Pads and rolls

For all of your general absorbent needs, select from a variety of pad and roll options

- Heavy, medium and lightweight constructions ensure an appropriate product for your application
- 2-ply construction combines absorbent layer with spunbond coverstock to increase durability and reduce linting
- Perforations allow you to use only what you need, reducing waste

Catalog #	Type	Construction	Size	Quantity
CH303	Roll	Medium wt.	30 in. x 300 ft.	1/bale
CH30DP	Roll	Heavy wt.	30 in. x 150 ft.	1/case
CH15P	Roll	Heavy wt.	15 in. x 150 ft.	1/bale
CH100	Pad	Heavy wt.	15 in. x 19 in.	100/case
CH200	Pad	Light wt.	15 in. x 19 in.	200/case

High-traffic safety mats

Need an absorbent that stands up to the demands of your facility? The high-traffic series is the solution for you

- Combines the absorbency and safety design of our traditional pads and rolls with the incorporation of a barrier backing for added strength
- Barrier backing designed to be non-slip (even in the presence of foot and forklift traffic) and non-permeable (fluids captured in this mat will not seep through to the floor underneath)

Catalog #	Type	Construction	Size	Quantity
CHBB30	Mat Roll	Heavy wt.	30 in. x 100 ft.	1/case
CHBB15	Mat Roll	Heavy wt.	15 in. x 100 ft.	1/bale

Pillows and SOCs

If you have specialty applications in your facility, pillows and SOCs are a great choice

- Pillows provide the greatest absorption per square inch and are ideal for capturing leaks from machinery raised off of the floor, or in sumps for maximum absorbency and easy retrieval
- SOCs mold around machinery, flush with the floor, to prevent leaking liquid from reaching aisles and walkways

Catalog #	Type	Size	Quantity
CH1818	Pillow	18 in. x 18 in.	16/case
CH124	SOC	3 in. x 12 ft.	4/case
CH412	SOC	3 in. x 4 ft.	12/case
