

Laboratory identification and tracking solutions

Product catalog

Laboratory identification and tracking solutions

When it comes to reducing errors in your lab to improve productivity and efficiency, you need durable labels and an inventory management system you can trust. That's where we can help. With Brady, you get a reliable partner with full solutions in lab identification and specimen tracking, so you can maintain the integrity of your work while improving efficiencies.

Experience and support you can trust

Brady has been offering identification solutions to the global laboratory market for more than 15 years. Our experience is enhanced by the dedication of our highly qualified support team. This group is on hand to help you find a stock or customized labeling solution that aligns with your needs.

Proven lab products

Our identification solutions are backed by proven laboratory label materials, printers, software and scanners designed specifically for the needs and challenges of your laboratory environment, including harsh chemicals, autoclaves, liquid nitrogen and more.
